

Transition Layer

```
graph TD; Input[ ] --> BN[Batch Norm]; BN --> ReLU[ReLU]; ReLU --> Conv[Conv 1x1]; Conv --> AvgPool[AvgPool 2x2];
```

A vertical flowchart illustrating the components of a Transition Layer. It starts with an input arrow pointing to a pink box labeled 'Batch Norm'. This is followed by a blue box labeled 'ReLU', then a yellow box labeled 'Conv 1x1', and finally a purple box labeled 'AvgPool 2x2'. Each component is connected to the next by a downward-pointing arrow. The entire sequence is enclosed in a light orange rectangular frame with a thin orange border.

Batch Norm

ReLU

Conv 1x1

AvgPool 2x2
